

Learner Profile™ Assessment Tools for Educators

SUNBURST. Systematically evaluate students in *every* learning situation with **Learner Profile™ Assessment Tools**. Designed to support educators as they manage student learning and their administrative and reporting responsibilities, **Learner Profile™ Assessment Tools** help record, track, and quantify a variety of assessment measures.

Traditional tests, group projects, writing portfolios, oral presentations, and other performance-based learning can be uniformly evaluated. Teachers use their PDAs as electronic clipboards to collect student assessment information and performance data as it occurs. This information is uploaded to their desktop computers where student files are automatically maintained. Students' grades, anecdotal information, and assessments can be posted in a full-featured, password-protected *GradeBook*, which is adaptable to any school calendar.

Teachers can generate reports from a collection of modifiable templates. Reports to students, parents, administrators, and school specialists can be executed with minimal effort. The **Learner Profile™ Assessment Tools** also allow educators to write and share lesson plans, student data, and assessment criteria with other teachers and administrators.

Learner Profile™ Assessment Tools consist of:

Learner Profile™ 3.0 for the desktop computer: *The Planning Tool* maintains student files, a database of learning criteria, the *GradeBook*, and your report files.

Learner Profile™ to Go 3.0 for the PDA: *The Collection Tool* helps you execute your plans for the day.

MAC / WIN CD 7577DH

1 PLAN!

On your desktop, create learning indicators for individuals or groups. Download plans to your PDA.

2 OBSERVE!

As students read, calculate, perform, and demonstrate their learning, simply click on their names, the learning indicator, and their level of mastery. Send the events of the day back to your desktop computer.

3 REPORT!

Automatically manages data and students' records. Effortlessly provide reports to students, parents, teachers, department heads, and administrators.

BRAND NEW! NETWORK

-  Saves valuable planning time
-  Automatically organizes student records
-  Helps you meet national, state, and local standards
-  Streamlines administrative duties
-  Improves school-wide communications
